

# Technologies for 2020

**Technology experts at Battelle, a world renowned technology organization based in Columbus, Ohio, have compiled a list of the ten most strategic technological trends that will shape business and our world over the next twenty years.**

***Genetic-based medical and health care.*** Medical technology based in genetic research will allow detection and correction of genetic-based diseases before they arise.

***High-power energy packages.*** Highly advanced batteries, inexpensive fuel cells, and micro-generators will make electronic products and appliances mobile.

***GrinTech (Green Integrated Technology).*** Environmental concerns will be thrust to the forefront for consumers and industry. Technology will create systems that

eliminate, rather than reduce, waste.

***Omnipresent computing.*** Miniature, wireless, powerful, personalized computing with network access will appear on the market as jewelry or watches, and later will be embedded in clothing or skin.

***Nanomachines.*** Microscopic machines, measured in atoms, will revolutionize industry, performing jobs from heating homes to curing cancer.
